O-Ecoat 34-200 series

Direct-to-metal match for OEM E-coat primer on steel, aluminum and fully cured painted substrates

VIETEK O-Ecoat is a color and gloss matched inner panel direct-to-metal coating. It's designed to duplicate the appearance of OEM-applied E-coat primers on internal panels such as under hood and trunk compartments, core support, quarter panels, inner door and kick panel areas. Adheres to clean, properly prepared metal and fully cured painted or primed metal surfaces.

- Can be topcoated with most automotive basecoats
- Excellent gloss and color match
- Direct to steel, aluminum and painted metal
- Cures and hides quickly
- Duplicates factory appearance
- Excellent corrosion control
- Shop floor compliant (NESHAP)
- Scratch, chip and chemical resistant
- Superior adhesion and corrosion protection

BED-ROCK Bedliner [Black]

Truck bed multi surface defensive coating – 50-state VOC-compliant

VIETEK BED-ROCK Truck Bed Multi Surface Defensive Coating is a durable two-part polyurethane coating system that looks great and works even better. **It's easy to apply and is sprayed at 1/2 the air pressure of competitive brands, producing significantly less overspray and mess.**

VIETEK 35-899 [3.5 Liter]

Covers standard 6' truck bed and tailgate

Kit contains: Application Gun, Measuring Cup, 3 cans Part A Bedliner and 1 can Part B Catalyst. Full instructions on package insert.

VIETEK 35-891 [1.18 Liter]

Add-on kit needed for full-size 8' truck bed or can stand alone for smaller jobs

Kit contains: 1 Can Part A Bed Liner and 1 can Part B Catalyst. Full instructions on package insert.

Scan our QR code to go directly to the product web page.

VIETEK 35-825

BED-ROCK GripTrack, Traction Additive

E-PRIME [Gray]

34-230 Self Etch Primer

E-Prime Is part of VIETEK's new line of engineered defensive coatings. E-Prime is a low-build, VOC-compliant [Gray] aerosol etching primer. Use anywhere a high quality etch primer is called for.

E-Prime is quick drying. It promotes excellent adhesion and corrosion resistance to properly prepared, cleaned and sanded bare metal substrates such as steel, stainless steel and aluminum. Dry to topcoat in 10–20 minutes.

Scan our QR code to go directly to the product web page.

V-E PRIME [Gray-Green]

34-240 Epoxy Primer

34-247 Epoxy Primer Catalyst

VIETEK V-E Prime 2.1 VOC Epoxy Primer Sealer is engineered to protect the system integrity of successive filler, primer and topcoat systems and is especially intended for large bare metal areas prior to application of VIETEK's BED-ROCK Bedliner.

36-300

Premium Wash Thinner

100% premium virgin solvents

Available in gallons, 5-gallon pails and drums

Our highly effective custom blend of 100% virgin solvents is intended specifically for tool and equipment cleaning operations. VIETEK Premium Wash Thinner is designed to aggressively soften, clean and remove both water- and solvent-borne automotive refinish coatings, such as primers, clears and color, from paint mixing and application equipment.

to go directly to the
product web page.

36-333

Lacquer Tool and Equipment Wash

100% premium virgin solvents

Our highly effective custom blend of 100% virgin solvents is intended specifically for tool and equipment cleaning operations. VIETEK Lacquer Tool and Equipment Wash is designed to efficiently soften, clean and remove both water- and solvent-borne automotive refinish coatings from paint mixing and application equipment. Our unique and custom "TAP-PAIL" safely dispenses solvents without having to pour or pump materials into a container; no more splashing or spilling with this safe and convenient way to dispense.

VIETEK 36-051 TEK-TAP faucet sold separately.

product web page.

36-350

Compliant Wash Thinner

100% Premium Virgin Solvents

Available in gallons, 5-gallon pails and drums

Regulatory VOC 0.13 lbs/gal

VIETEK Compliant Wash Thinner is designed to aggressively soften spray coatings such as primers, sealers, single-stage and two-stage paint systems. Clears just about any coating you would use your spray equipment for. It will not cause corrosion, easily wipes dry and is made with 100% virgin solvent.

to go directly to the
product web page.

36-650 Gun Flush

Spray Gun Cleaner

14-oz. aerosol with nozzle tube and grommet seal

VIETEK Gun Flush is specially formulated to safely yet aggressively soften and remove residue left behind from all automotive refinish solvent- and water-based coatings. It is extremely effective on all internal and external spray equipment parts and surfaces. VIETEK Gun Flush will not cause corrosion or damage spray gun gaskets, seals or packing.

Assure Compliance with local Air Quality Regulations before use!
VOC Compliant per SCAQMD Rule 1171-Solvent Cleaning Operations.

product web page.

36-700

Wax and Grease Remover

Available in gallons and 5-gallon drums

Regulatory VOC: 6.37 lbs./gal. 763.5 g/l

VIETEK Wax and Grease Remover is used to easily remove surface contaminants commonly found on painted surfaces such as wax, grease, tar, adhesive residue, insect residue, tree sap as well as other commonly used car care products. VIETEK Wax and Grease Remover is designed to quickly soften, dissolve and allow contaminants to be wiped away prior to paint and body repair and or refinish operations.

36-707

7-ZERO-7

Zero-VOC surface cleaner

VIETEK's all-inclusive surface cleaner is a high-performing, zero-VOC solution to all refinish pre-coating cleaning needs.

VIETEK 7-ZERO-7 Waterborne Surface Cleaner is a 50-state-compliant, nonhazardous, environmentally safe product.

7-ZERO-7 is engineered for cleaning and removing solvent- and water-soluble contaminants prior to refinishing. This versatile and easy-to-use product is recommended for use on all paintable substrates such as plastic, steel, aluminum, previously primed or painted surfaces, and fiberglass. 7-ZERO-7 features a streakless formulation that won't soften underlying coatings. It cuts, cleans, removes grease, oil and performs like conventional solvent-borne cleaners. We recommend using a high-quality refinish wiper such as VIETEK's 43-135, 155 or 156 TEK-PRO wipers.

NOTE: Be sure to follow all product usage instructions.

36-660, -670, -680, -690 Universal Urethane Reducers

Available in gallons and 5-gallon “TAP-PAIL”

VIETEK’s urethane reducers are formulated using only 100% virgin solvents. These high-grade reducers are recommended for use in 2K urethane primers, clears, single-stage color and basecoats and are perfect for any product requiring a high-grade urethane reducer given no requirement for stabilizing or reactive reducers. Available in temperature ranges from fast to extra slow.

42-100, -200 TEK-Filler Boards

Disposable, non-absorbing
HD paper mixing sheets

Pkg. quantity: 1 ea. board containing 100 sheets

VIETEK's TEK-Filler Boards are designed to take the hassle out of mixing autobody fillers and glazes. The TEK-Filler Board sheets are chemical resistant, so they don't absorb or soak through and are bound on three sides so they stay put as you mix. TEK-Filler Boards are available in two convenient sizes—8.5" x 11" and 11" x 17"—and are engineered to handle well so holding on while mixing and applying fillers is easy. Once finished, simply tear off the top sheet and dispose. Other uses include fiberglass, resins, plastics, gels, touch-up paints, pinstriping, adhesives and more.

product web page.

41 Series TEK-MIX Mixing Cups and Lids

TEK-MIX graduated paint mixing cups are the perfect combination of VIETEK value and features, engineered specifically for automotive and industrial paint materials. TEK-MIX cups have a true flat bottom with no grooves or ridges. This allows for thorough integration of all mixed components and is especially critical with on scale paint color mixes where it is crucial to completely incorporate all components for color accuracy.

49-777

Final Prep Scuff and Clean Paste

16-ounce flip-top container • Case quantity: 6

VIETEK Final Prep Scuff and Clean Paste is a complete prep solution designed to save time and money, formulated to thoroughly clean as it abrades, with specially engineered abrasive compounds and concentrated surfactants that truly go further than competitive products.

Final Prep effectively cleans by removing paint contaminants such as mold release agents, grease, oils, silicones, wax and road film.

Final Prep deglosses any paintable surface and produces a uniform 1000-grit profile when used with VIETEK's 49-704 Gray TEK-FLEX Soft Scuff Surface Prep Pads. It is extremely effective on blend panels and flexible parts such as bumper and trim panels; rinses clean with water, assures the surface is completely deglossed, no additional cleaning or sanding needed.

49-703, -704

TEK-FLEX Soft Scuff Surface Prep Pads

49-703 Maroon and 49-704 Gray TEK-FLEX Soft Scuff Surface Prep Pads are a highly efficient, strong and extremely flexible surface preparation solution. TEK-FLEX pads come in two grit offerings, the 703 Maroon pads leave a consistent 320- to 400-grit profile scratch, and the 704 Gray pad range is 800/1000 grit.

43-100 Series Shop TEK-RAG

Multi-Purpose White Utility Towels
43-117, 118, 119 multiple sizes and configurations

Another in a winning lineup of co-branded products from our partnership with Sontara®, the industry leader in wiper materials. Shop TEK-RAGs are engineered to cover a broad range of cleaning and wiping needs and come in several size choices from ¼ fold to pop-up and multiple roll options. This extremely versatile towel material is highly absorbent, with more than two times faster absorption than paper alternatives, and is also extremely durable and longer lasting than paper-type products.

VIETEK Shop TEK-RAG series of products far outperform all competitive materials by delivering **superior performance in areas that don't require lint-free wipers**. Shop TEK-RAG products are disposable, non-woven, hydroentangled, dye- and binder-free, and will not contaminate surfaces or your work, making this the perfect product for all your general-purpose cleaning and wiping needs.

- **Tougher than paper, 80% cellulose and 20% synthetic, hydroentangled for absorbency and durability**
- **Won't scratch surfaces**
- **Outlasts paper towels**
- **Soft on hands**
- **Non-woven, hydroentangled**
- **No glues, binders or chemicals to contaminate your work**
- **Highly absorbent, with more than 2 times faster absorption than paper alternatives**
- **Solvent and chemical resistant**

43-125

TEK-Towel

Refinish All-Prep Wiper

100 15" x 12.5" wipers per box • 8 boxes per case

VIETEK has proudly partnered with Sontara®, the industry leader in wiper materials, to deliver this multi-purpose Refinish All-Prep Wiper engineered to do more of your body shop's cleanup operations. VIETEK TEK-Towel is the perfect all-around wiper for paint shop cleanup and preparation operations from pre-bodywork through the final wipe down prior to coatings application. They do not break down when using solvent cleaners and, because they are super absorbent, don't just push cleaners around. Use on glass, mirrors and plastic for a streak-free clean. TEK-Towels contain no glues, binders or chemicals that can contaminate your work; they are hydroentangled, precision cut and interfolded with zero trailing fibers.

43-740

FIRST-TACK [White]

High Tack Surface Prep Cloths

12 individually packed cloths/box • 12 boxes/case

VIETEK has proudly partnered with Sontara®, the undisputed leader of high-quality wiping materials, to deliver our selection of premium high-performance tack cloths.

VIETEK FIRST-TACK is a very efficient long-lasting, 1/8-folded, white high-tack surface prep cloth. FIRST-TACK is engineered to trap and remove high levels of dirt and sanding residue. It can easily be peeled apart and bunched to create a billow effect; this allows efficient trapping of contaminants with less pressure and less potential to transfer tackifier agent to the surface.

Scan our QR code to go directly to the product web page.

43-786 [Green] 43-787 [Blue]

BASE-TACK

Medium Tack Surface Prep Cloths

12 individually packed cloths/box • 12 boxes/case

VIETEK has proudly partnered with Sontara®, the undisputed leader of high-quality wiping materials, to deliver our selection of premium high-performance tack cloths.

VIETEK BASE-TACK Green and BASE-TACK Blue are medium-tack formulation, 1/4-folded tack cloths primarily intended for use in post sealer through basecoat applications. Its medium-tack formulation is ideal for removing contaminants such as dust and dirt just prior to applying basecoat. BASE-TACK is made with extremely flexible fabric that easily conforms to tight angles and hard-to-get areas without tackifier transfer. Additional tackiness can be achieved by simply stretching the fabric before use.

44-105 TEK-MAP

Process Information Grid

Removable self-adhesive windshield repair process communication form

**NEW SUBSTRATE • EASY TO APPLY
COMPATIBLE WITH SHARPIE® MARKERS**

VIETEK TEK-MAP Process Information Grids are designed to provide information that has been identified as most important to technicians, CSRs and detail personnel. They are very comprehensive yet simple to use and are intended to trigger downstream action by technicians and sublet providers, helping to ensure that all personnel become involved with needed documentation, important timelines and fulfilling customer expectations.

44-105 TEK-MAP Process Information Grids are part of our growing group of distinguished products that can reduce cycle time through efficient operation and wear our "DMAIC/KAIZEN" shield.

- **Guides repair process start to finish**
- **Increases Touch-Time**
- **Reduces repair process Cycle-Time**
- **Self-Adhering**
- **Easy On-Off, no shadowing of glass from markers**
- **105 individual grids per roll**

44-116 V-Guard

Body Technicians Magnetic Edge Protectors
4 21-1/2" x 1-3/16" V-Guards per tube

VIETEK's V-Guard Magnetic Panel Edge Protector was engineered to protect against unwanted damage during repair and reassembly operations. This highly effective, versatile tool is a must for every body technician.

Protect adjacent panels during sanding, grinding and reassembly operations. It saves time and costly masking tape by holding down loose masking materials and plastic sheeting in the booth and shop.

The highly visible bright orange color directs working hands away from costly mistakes and reduces the potential to discard with masking materials. It pays for itself the very first time you hit it with a sander, grinder or tap an edge during reassembly.

55-550

Glassy

Aerosol Foaming Window Cleaner

Net Wt. 18.5 ounces • 12/case

VIETEK *Glassy* aerosol foaming window cleaner is formulated to save time and deliver clear, consistent results.

Glassy has a clean fresh scent and is ammonia- free so it's safe on window tint. Glassy's heavy concentrated foam stays put on vertical surfaces, which allows its powerful formula to go to work on softening bugs, water spots, grease, grime, as well as stubborn film left behind from smoke and heat-generated interior residue. 55-550 *Glassy* is a highly effective multi-surface cleaner; this means it's perfect for just about any surface including chrome and plastic. Its streak-free formulation delivers "best in glass" results every time. Just spray on and wipe clean.

Glassy is a proven performer.

61-931

TEK-UltraGold

Premium Lightweight Super Grip Body Filler

Fill: 0.8 US gallon (3 L) • case quantity: 4

TEK-UltraGold is a premium body filler carefully developed for premium performance as a filler and final finish glazing putty. Its tack- and stain-free formulation will not clog paper and has superior feather-edge properties. TEK-UltraGold's special formulation allows maximum adhesion to clean, properly prepared steel, galvanized steel, aluminum, SMC, fiberglass substrates, as well as OEM basecoat, clearcoat and sanded, fully cured catalyzed primer systems.

- **Ultra-smooth filler and finishing putty**
- **Easy sanding**
- **Tack- and stain-free formula**
- **Superior vertical hold**
- **Will not clog paper**
- **Vacuum processed for zero pinhole performance**
- **Cream hardener (2.75 oz/78 g) included, mix 2% by weight**
- **Engineered for maximum adhesion to steel, galvanized steel, aluminum, SMC, fiberglass, body fillers, fully cured two-component primers and OEM topcoats**

61-516 V-Glaze

Premium Glaze

30 fluid ounces (880 ml) • case quantity: 6 pumptainers
creme hardener included

VIETEK's V-Glaze highly flowable two-part polyester glaze is engineered to fill small imperfections, such as sanding scratches, pinholes and chips. Unlike many glazing putties available today, V-Glaze easily applies over large areas all at once. Due to its high-flow characteristics, it can be applied very thin and feathered to an ultra-fine edge. For use over properly cleaned and sanded substrates (body fillers, steel, galvanized steel, aluminum, SMC, fiberglass, fully cured two-component primers and OEM topcoats).

61-514 TEK-FlexGlaze

Flexible Polyester Glazing Putty

30 fluid ounces (880 ml) • case quantity: 6 pumptainers
creme hardener included

This flexible highly flowable 2-part polyester glazing putty is engineered for skim coating and spot filling repair areas on flexible bumpers and plastic parts over small or large areas.

61-514 is ideal for filling deep sanding scratches, gouges, scrapes, pinholes, and minor imperfections. Can be used over properly cleaned and prepared flexible and rigid surfaces, TPO, SMC, Fiberglass, Metal, Galvanized Steel, Aluminum and fully cured and or OEM topcoat systems.

Masking

72-100 Premium Hand Masking Paper [Green]

VIETEK Premium Green Hand Masking Paper is 180' in length and available in both 12" and 18" widths. The VIETEK Green Hand Masking Paper is great for small jobs and projects where longer rolls are not required. It provides great paint adhesion for cleaner work and features 100% virgin fiber that is cleaner (less lint) and stronger (higher tensile strength, better tear resistance) than competitive brands.

Note: All uncoated green papers are subject to bleed-through; however, the VIETEK 72 series 28 lb basis weight green premium paper provides the best bleed-through resistance available among green uncoated masking papers.

Note: All uncoated green papers are subject to bleed-through; however, the VIETEK 72 series green premium papers provide the best bleed-through resistance available among green uncoated masking papers.

75-200 Poly Coated Masking Paper [White]

750' L x 6", 12", 18" and 36" widths

VIETEK 75-200 Poly Coated Masking Paper is impervious to bleed-through. With a basis weight of 35 pounds, this bright white coated paper has great light reflection, is strong, clean and, with its corona-treated surface, produces superior paint adhesion. VIETEK 75-200 series is competitive with all current white poly-coated papers on the market and offers the same performance as higher-priced masking papers.

75-300 Poly Coated Masking Paper [Blue]

750' L x 6", 12", 18" and 36" widths

VIETEK 75-300 Poly Coated Masking Paper is impervious to bleed-through. With a basis weight of 35 pounds, this coated paper is strong, clean, tear resistant and has a corona-treated surface for superior paint adhesion. VIETEK 75-300 series is comparable to all currently available blue poly papers on the market today.

75-500 Poly Coated Masking Paper

[Green Gator Back]

500' L x 6", 12", 18" and 36" widths

VIETEK 75-500 Poly Coated Masking Paper is constructed of tan or brown kraft base sheet with a green tinted poly coating. With a basis weight of 30 pounds, this poly-coated paper is strong, clean and very tear resistant. It handles corners well, tape repositions easily, is puncture resistant and, due to its corona-treated surface, offers superior paint adhesion. VIETEK 75-500 series Green Gator Back is clearly the economic choice with premium performance in coated papers.

75-800 Treated Urethane Masking Paper [White]

750' L x 6", 12", 18" and 36" widths

VIETEK 75-800 is commonly referred to as Urethane Masking Paper and is constructed of the same white kraft base sheet as our white poly-coated paper. With a basis weight of 24 pounds, this chemically treated paper is designed to resist both water- and solvent-borne paints. It is strong, clean, contours well around corners and its bright white color has superior light reflection, allowing high visibility and easier color matching.

73-Series HD Plastic Sheeting

High-density masking polyethylene plastic sheeting

VIETEK Plastic Sheeting is a polyethylene plastic that offers excellent cling properties without bothersome static electricity that can attract dust. VIETEK Plastic Sheeting is fully corona treated to provide superior coating and overspray adhesion. Our sheeting is packaged in an easy dispensing carton that keeps plastic clean and neat.

Can be baked @ 225°F for up to 1 hour.

	Length	Width
73-312	400'	12'
73-316	350'	16'
73-320	250'	20'

Barrier Crash Wrap Protective Films

74-045 Barrier 45 Crash Wrap

1- 36" x 100'

VIETEK Barrier 45 Crash Wrap weather barrier film is a 3-mil clear polyethylene film with incorporated UV inhibitors. It is specifically engineered to protect vehicle interiors from the elements for 45 days after a collision or vandalism has compromised windows, sun roofs, gap seals and any other opening that was otherwise designed to keep the outside environment outside.

Apply to clean surface; we recommend VIETEK 55-550 Glassy Foaming Window Cleaner for best results.

74-365 Barrier 365 Crash Wrap

1- 36" x 100'
roll per box

VIETEK Barrier 365 Crash Wrap weather barrier film is a 3-mil yellow polyethylene film with incorporated UV inhibitors. It is specifically engineered to protect vehicle interiors from the elements for 365 days after a collision or vandalism has compromised windows, sun roofs, gap seals and any other opening that was otherwise designed to keep the outside environment outside.

Apply to clean surface; we recommend VIETEK 55-550 Glassy glass cleaner for best results.

82-200 Series TEK-SUIT KOOLCOMFORT

[Disposable, Anti-Static]

Individually bagged • 50/case

The KOOLCOMFORT 82-200 series disposable paint suit is engineered to keep you comfortable in tough environments. Our unique patented AEROTEK lightweight fabric keeps you cooler and dryer than any other available disposable protective paint suit. Our anti-static fabric permits heat and moisture to escape while meeting OSHA 1910.132 requirements against isocyanate penetration due to back-spray mist or vapor. This garment complies with ASTM F903 for liquid-proof breathable fabrics.

This proven performer comes in a variety of sizes and offers exceptional features. Our hooded, full-body protective paint suit is designed with highest attention to detail. Our patented Action Seat allows a broad range of motion without ripping at the crotch, and an elastic waistband comfortably keeps the suit away from what you are painting without restricting motion. With adjustable hook and loop leg closures, you can easily step into the suit without removing your shoes. Finally, elastic wrist cuffs and a convenient rear hip pocket make the KOOLCOMFORT TEK-SUIT a great choice for every paint environment from automotive, industrial, marine and more.
